COMPANY PROFILE

EVER RICH FOUNTAIN | ERF

公司簡介 Company Profile

永泉豐(ERF)自1991年成立以來，不斷地追求成長與進步，我們結合了精湛的製造技術、新穎的瓶身設計、縝密的組裝、及優質的印刷技術，為顧客提供最完善的服務品質。成立至今，ERF以穩定的品質與不斷的創新，在海內外擁有亮眼的業績，將最優質的產品銷售到台灣、東南亞、日本、澳洲、歐洲及美國等地區。我們堅持以最專業的品質與技術，隨時準備為您做最佳的服務。

ERF的產品有真空瓶、乳液壓頭、精華液吹瓶、精華液點滴、霜瓶等多樣化選擇。更為客戶提供如金屬電鍍處理、真空電鍍、UV霧面、塗裝處理及印刷燙金等二次加工服務。

秉持著謹慎小心、品質第一、服務至上的經營理念，永泉豐所生產的瓶子從設計、製造、印刷、組合到包裝所有的步驟及過程，都有品質控管專職人員做層層嚴格的把關，使得ERF的產品在同業及顧客之間享有極高的口碑。

如果有任何的問題、建議或欲索取樣品，請與我們聯絡並且給予指教，我們隨時歡迎您的來電洽詢。

ERF (EVER RICH FOUNTAIN ENTERPRISE CO., LTD.) is one of leading manufactures of cosmetic containers in Taiwan. Since ERF established, we have been keeping pursuing development and progress on products. For providing customers perfect service quality, ERF integrates well manufacturing and tooling techniques, novel and innovative designing of bottles, and high quality printing skills. With stable quality and ongoing innovation, ERF has been exporting products to South-East Asia, Japan, Australia, Europe and America etc. ERF insists to present professional quality and technology for you to upgrade the competition in your market.

ERF has various kinds of plastic injection components for skin care merchandise such as airless bottles, treatment dispensers, PETG blow bottles, cream jars, pipettes etc. All of our components are available in numerous styles and colors for your selection. To create a unique image of your selection, all items can be customized, decorated with finishes such as metallizing, vacuum anodizing, UV varnishing, lacquering, silk printing, hot-stamping and soft touch coating etc.

ERF with the operation concepts of providing high care, high quality and perfect service, our QC Department inspects in every process of design, producing, printing, combining, and packing. ERF takes pride in the quality of our work, our devotion to clients and the positive impact we have on people.

ERF services on a global scale. To learn more about our products or request samples and catalogues, please feel free to contact us. We look forward to being your business partner.

Features

1. 精緻的雙層瓶身提供多變的設計選擇
 2. 適合填充凝露、精華液、乳液、清潔乳...等保養品。
 3. 真空設計，避免內料氧化以延長保存時效。
 4. 內料幾乎不殘留 避免浪費。
 5. PP環保塑材，耐化性高，適用於醫美產品。
1. Delicate double wall design gives additional decoration options.
 2. Perfect packaging for skin care products such as gel, lotion, serum, cream and cleanser etc.
 3. Avoiding contents oxidation and contamination and increasing shelf life.
 4. Fully evacuate product to avoid waste.
 5. Eco-friendly PP (polypropylene) airless bottle. Excellent chemical resistance.

■ Features

1. PETE 材質瓶身,似水晶/玻璃般具有高透明度的特性。
 2. 適合填裝黏稠度高的乳、霜狀保養品。
 3. PETE材質性耐衝擊不易碎,可避免運輸過程可能產生的破損。
 4. 相較於PS或壓克力材質, PETE 更具耐化性,適用於醫美產品。
 5. 內料幾乎不殘留 避免浪費。
1. Excellent transparency character provides clear look just like crystal or glass.
 2. Perfect packaging for high viscosity skin care products.
 3. Its high break resistance feature is a great substitute for glass.
 4. High chemical resistance.
 5. Fully evacuation to avoid waste of formulations.

AIRLESS BOTTLE INFORMATION

真空瓶相關資訊

Airless Bottle Information

- 瓶身材質分類
 - 塑膠PP材質：耐化學性優，透明度較低(半透明)，不易碎。
 - 塑膠PET材質：耐化學性良，透明度高，不易碎。
- 真空瓶是一種非常適合黏稠性質之液態產品的包裝容器。
- 真空瓶容器需要注意充填飽和度，如果內容物的黏稠度過高，在充填過程中容易產生氣泡。因此當黏稠度過高時，須考量並調整內容物的配方以降低其黏稠度。若配方無法做任何調整，則必須將產生的氣泡排除。
- 真空瓶的充填工作，務必要確實充填至肩部位置，並將壓頭鎖緊，使得真空作用可以正常運作。
- 如果內容物成份含有醛類、醇類、香氣類、熊果素、海水抽取物等等成份，建議用一段時間來測試內料與包裝容器的相容性。
- 真空瓶可依設計需要，做二次加工處理，如UV霧面處理、塗裝顏色處理、電鍍金屬顏色、印刷或燙金等。建議用適當的時間測試，經二次加工的瓶器與充填物接觸後，是否仍可維持原來的附著度。
- 真空瓶底部的透氣孔請勿封住，以維持真空瓶的功用。

- Classification of Material on Bottle:
 - Polypropylene: good chemical resistance, with transparency (nature color) and greater freedom from environmental stress cracking.
 - PETE: good chemical resistance, high transparency (clear color) and greater freedom from environmental stress cracking.
- Airless Bottle is a perfect packaging for skin care products such as gel, lotion, serum, cream and cleanser etc. Vacuum system storage can avoid contents being oxidized, and keep ingredients in fine condition.
- Please notice the viscosity of stuffing. It is easy to occur bubble while filling too thick viscosity materials. It is necessary to adjust formula when the viscosity is too thick. If the formula can not be adjusted, please try to decrease the bubble.

- Please firmly fill up the stuffing to the shoulder of the bottle, (Be sure fill bottle full, and do not over the position of neck bottom.) and screw the dispenser tightly.
- Some materials such as aldehyde, alcohol, marine water extract, etc are not quite suitable to use airless bottle as a container. It is crucial to test the compatibility of filling materials with the container and its variation decorated treatments.
- Design depends on customer's requirement: custom coloring and finishes like UV varnishing & lacquering, metalizing, silk printing & hot stamping etc. We make your idea come true. Due to filling materials may cause adhesion problem by chemical reaction when filling materials have been touched with the lacquering. We strongly suggest testing the adhesion of lacquered surfaces with filling materials.
- Do not cover the small hole of the base.

側視圖 Side View

逆迴流塞的功能 Function of the plug

當瓶身倒放時，能夠防止內料流至牙口。
Using plug can prevent filling materials flowing to dispenser while the bottle stays flat.

逆迴流塞的使用方法 Instruction of using plug

- 請將內料充填至肩部。
 - 然後將逆迴流塞放入（請注意"a"面朝上），並將壓頭鎖緊。
- Please firmly fill up the stuffing to the shoulder of the bottle.
 - Then insert the plug (the edge of "a" should be up), and screw the dispenser tightly.

請務必充填至此處。

■ Filling up till this position (no more / no less)

■ 注意：請勿將底座透氣孔封住。
Notice: Do not cover the small hole of the base.
